There is no need to rush or push. This is a time to take things as they come. You have the determination and patience to handle what is happening.

Right now, the benefits of being present outweigh the desire to create something or pursue a new endeavour. Be peaceful and take your time. Know that you will receive guidance about when to start a new chapter of your life. If you become impatient or want to push to create what you desire, redirect your attention to leisure activities. Find ways to occupy yourself so you can regain your sense of self and find the gifts in the process at hand.

It is natural to form an initial view of a challenge or situation.

You do this instinctively and without any awareness. However, your first impression may limit your problem-solving ability if you do not go beyond it. If you continue to address this situation from your current viewpoint you will see nothing new. Try stepping back and seeing things differently or from a different angle, and a new perspective will present itself. On a deeper emotional level, the spontaneous actions you have chosen may have caused you to feel unrest in your daily life.
